Secondary Services

(DECORATING AND ASSEMBLY)

DECORATING & ASSEMBLY

Polymer Technology provides a total components procurement solution for our clients. With a growing emphasis on integration and providing sub-assembled components to customers, our value added services include pad printing, painting, laser marking, heat staking, ultrasonic welding, gluing and assembly. We also provide custom

packaging consultation along with complete warehousing/logistics solutions. These services merge our injection-molded components with purchased components in order to create value for our customers by supplying higher-level assemblies.

Decorating Solutions

- Epilog laser etching & engraving system
(paint & laser etching for backlit instrument controls)
(barcoding and serialization marking)
- Comac pad printing systems
- Solvent/epoxy bonding systems

- Chrome plating
- Paint lines – rotary and linear
- Heat stake systems
- EMI shielding
- Sonic & hot plate welding

Assembly Services Solutions

- Sub-assembly
- Complete supply chain management
- Logistics services (domestic & offshore)
- Assembly packaging & documentation
